

# Doak MK4 Portable Surgical Table

NSN : 6530-01-615-1759

The Doak Table™ is a portable field surgical table that deploys within 60 seconds to receive a standard military litter. The base table weighs between 41 – 45 lbs depending on configuration and will fold to dimensions of 41" x 12" x 15". The table will accommodate a litter weight in excess of 400 lbs. The base table is a single, fully-integrated unit with no loose pieces that can be erected without tools. Other features include height adjustability and the ability place a patient in Trendelenburg or reverse-Trendelenburg position. Arm boards, IV poles, surgical instrument trays and a variety of feet/wheels are available to customize the table to the user's exact requirements. The standard accessories package weighs less than 32 lbs.

## Intended Usage

With armed conflict, natural disasters and humanitarian tragedies occurring regularly, medical professionals are increasingly taking care to patients in non-traditional medical care situations. The lightweight, strength, stability, compactness and rapid deployment capability of the Doak Table™ makes it the ideal platform for caregivers in any situation where permanent facilities are not available. The Doak MK4 Portable Surgical Table has been purchased and deployed by 3 branches of the US Military including Special Forces units.

## Doak MK4 Portable Surgical Table Specifications

1. Portable one-man carry. Table weighs 41 to 45 lbs. depending on model and mission requirements not including optional accessories and wheel sets. Folded dimensions: approximately 41" x 12" x 15".
2. Unfolds and ready to receive litter in less than 60 seconds, without tools. No assembly required.
3. No loose pieces on the basic table to assemble or be found missing in the field.
4. Supports litter with well over 400 pounds. Litter has been loaded to 600 pounds without damage to table.
5. Litter working height quickly adjustable from 28" to 36" in one-inch increments without tools.
6. Provides Trendelenburg and reverse Trendelenburg position from either end, with up to 15" elevation in one-inch increments in less than five seconds.
7. IV pole mounts built into all four corners of the table.
8. Side rails accept all surgical table accessories that mount on 5/16" x 1 1/8" side rails.
9. Stainless steel tie-downs at each corner, individually rated to approximately 8,000-pound tensile strength.
10. Stationary-use legs with non-skid self-leveling feet are interchangeable with casters and wheels.
11. Stationary legs can be switched to wheels or vice versa without tools in less than 10 seconds per leg.
12. Wheel sets offered for rolling mobility and rolling table with patient and attached equipment on/off aircraft. Various wheels and casters available depending on rolling surface and user requirements.
13. Table will pass through a 30" doorway (excluding optional side-rail-mounted equipment).
14. Lightweight field surgical table support equipment offered includes stainless steel telescoping IV poles; pole-mounted swiveling cantilevered Mayo tray; side-mounted miscellaneous surgical items tray; end-mounted anesthetist's gear tray; multi-position end-mounted brackets to support a ventilator, vital signs monitor, or other surgical/anesthetist equipment; contoured multi-position arm boards; antimicrobial-vinyl fluid containment sheet with a stainless steel drain; and folding lower shelf that will support 200+ pounds of equipment and miscellaneous gear.
15. Doak Portable Surgical Tables are deployed by JSOC, the U.S. Navy and the U.S. Air Force.
