

BAK-PAK II™

The BAK-PAK II™ Long Spine Immobilization Board was designed by an EMT and constructed by a mechanical engineer with the intention of making a board where every inch, every contour and every feature will serve a purpose.

The BAK-PAK II™ spine board is constructed of LLD polyethylene, and is foam-filled - making it great for water rescues! Guaranteed not to crack, splinter or chip. The convex bottom's built-in runners provide raised access to the easy-grip handles.

SPECS

- Dimensions: 72" x 16" x 1.13"
- Weight: 11.5 lbs
- Load Capacity: 450 bs
