

TK4 One-Handed Compression Strap

The TK-4 compression strap features a strong woven elastic textile band (2" wide by 40" long) that provides incredible strength and flexibility. With one steel hook fastened steadfast to both ends of the elastic band, and packaged in a small, vacuum-sealed pouch, TK-4 is ideal for stopping or slowing the loss of blood from a large wound.

Small and easy to use, the TK-4 compression strap allows users to quickly apply compression against a wound or to compression an extremity to reduce the excessive blood loss. The elastic strap stretches to add more pressure over the wound area.

SPECS

- Package Dimensions: 2.7" x 1.9" x .9"
- Package Weight: 2 oz.
- NSN 6515-01-578-6354
