

AERO SENTRY™

Aero Sentry™ is an easy-to-use, portable aircraft and asset security system. This wireless “trip wire” product consists of handheld units that can be set up around the aircraft to form an invisible fence. When an intruder crosses the fence line, an integrated camera provides visual confirmation of the intrusion, and the alert and image are displayed on a control tablet and relayed to any mobile device via MMS or SMS message.

APPLICATIONS

Aero Sentry™ provides intrusion detection on any terrain, non-line of sight locations, foliage, and other obstructions. Applications and features include:

- Protection of fixed-wing or rotary wing aircraft
- Secure the perimeter of fuel depots and tankers
- Other high value asset protection
- Easily integrated with traffic cones and other barriers
- Provides archived logs and time-stamped images
- Protects assets from tampering, boarding, and theft
