

POWER BOX: PEDAL POWERED GENERATOR

POWER
BOX

The Power Box is great for emergency power and should be on your checklist for basic emergency survival kit supplies. Made for emergency situations (natural disasters, theaters of operations...), it allows you to charge all your devices and generates power in extreme situations.

AWARD WINNING TECHNOLOGY:

The Power Box was a 2011 CES Innovation Awards honoree in the category of portable power.

UNIVERSAL ELECTRICITY GENERATOR:

The Power Box is a pedal generator that can be used with your legs or arms. Electricity is generated as you pedal, like on a bicycle. It charges the batteries of a full range of portable electronics. Or, charges external batteries to power laptops and all kinds of appliances — either directly from the batteries or through an inverter.

POWERFUL AND VERSATILE:

The Power Box can produce up to 20 watts. Because it is so powerful, it can charge more than one device at a time.

COMPACT:

Small, lightweight and portable, the Power Box folds in seconds, to the size of a shoe box. Dimensions folded: 12 x 5.5 x 3.5 in. It weighs just 4 pounds, 11 ounces.

POWER BOX

EFFICIENT DESIGN:

The Power Box is designed to be very efficient. It converts the generator output to 120 Volts DC with 85% efficiency. 120 Volts DC is compatible with all switching chargers — the type used with all portable electronics, because they are also very efficient.

Any device with a switching charger of less than 20 watts will work with the Power Box. This includes all modern cell phones, smart phones and others...The crank speed is 1.5 cycles per second.
